Guidelines for Editorial Contributions

We are always eager to receive your editorial contributions. We can handle anything from handwriting on legal paper to data typed on computer diskettes in ASCII language, but our chances of producing a first-quality publication will be greatly enhanced if contributors prepare their manuscripts and photographs according to the following criteria:

Articles

- Articles should be typed, double-spaced, on one side of plain, white paper.
- Type all manuscript copy in upper and lower case, not all capital letters.
- Allow margins of at least one inch on both sides of the typed sheet.
- Follow usual rules of capitalization and punctuation. The editors reserve the right to edit any manuscript according to style considerations specific to this publication.

Photographs

- Color prints on glossy paper provide the best chance for good quality reproduction, although our technology allows us to reproduce color prints quite well.
- The safest way to write photo captions and identifications is to tape a piece of paper to the back of prints. Ballpoint and felt-tip pens smear easily and can damage the photo.
- Do not staple photos. Be careful that paper clips do not scratch the image side of the photo; protect photo with a piece of paper under the clip.
- Put your name, address, and phone number on the prints so we can return them to you after printing.
- Be sure to completely identify all people in the photo and provide a photo caption.
- Submit all photos in .jpg format @ 300 ppi.
